Atmega328p pinout sticker pdf.

2 - I could download them, but the lettering was too small. So I made these on inkscape and IeAAAm posting them here and on reddit.com/r/arduino/comments/8ui130/atmega328ppu_sticker_labels_with_bigger_fonts/ Feel free to share and modify them, no credit necessary. Content tag, SEO, listing, Pizza and spaghetti [...] Page 4 03 July All you need is right here. No more looking up the datasheet or schematic! The stickers are made of a tough vinyl, usually used for bumper stickers, so they will not fade, scratch, or wrinkle. Versus other sticker found online: Imgur: The magic of the Internet By itself: Imgur: The magic of the Internet and Imgur: The magic of the Internet Just print the attached pdf (no scaling) or open the zip to edit the svg source. Content tag, SEO, listing, Pizza and spaghetti [...] Page 2 03 July All you need is right here. We offer 12 months warranty on this product from its date of purchase. The stickers are die cut already into a rounded rectangle that fits on top of the AVR Comes in a pack of ten, so you never need to feel like you're about to run out. They fit right on top of a DIP ATmega328 (or '168) chip, and clearly indicate every pin as it would be called in the Arduino IDE. This is available from Altronics stores, online purchases or Altronics resellers. 14 DAY MONEY BACK GUARANTEE Notwithstanding our warranty policy, if you are dissatisfied with our goods or service you may return the goods within 14 days of our despatch date. Using Arduino Microcontrollers I searched for some labels to print and glue to barebones arduinos and I found two kinds: 1 - They looked great, but the links had expired (temporary hosting, modified dropbox links, etc). They fit right on top of a 28 pin DIP chip, and clearly indicate every pin by port name or common use for the I2C and SPI pins. Update: I got a decent picture of these stickers vs the other stickers found online. These stickers are a must for anyone a design with an ATmegaXX8 chip, such as ATmega48, ATmega8, ATmega88, ATmega168 or ATmega328. AVR chips are not included, but we have Arduino-bootloader chips in the store. Content label, SEO, listing, Pizza and spaghetti [...] Page 3 03 July Everything you don't need is here.
